

Personal Computer Basics Free

Get to know your PC

Tuesday, Oct. 19

10 a.m. to noon

The Village Center

This class will provide a tour of a Microsoft Windows 10 computer to help you better navigate your own device, troubleshoot and find better and more creative ways to use it. The overview will include a review of the computer's file system (including folders, search, and favorites), anti-virus software and tips for staying safe online, options to view email, how best to back-up your computer, and organization tips for your desktop. And of course, time for your questions.
